

Steyr Zephyr II named 'Rifle of the Year'

ABOUT

Originating from a traditional location in Steyr, which was eponymous for the enterprise, Steyr Arms expanded to an international entrepreneurial group with premises in Austria and the USA. High-quality outdoor products are developed and marketed worldwide by Steyr Arms. These products are primarily hunting and sporting weapons, knives, apparel and accessories.

Furthermore, Steyr Arms is planning, together with selected partners, to create new product lines in the near future. Steyr Arms also produces law enforcement weapons. The precision and trend-setting product development of the Steyr Arms house are always and everywhere in demand. Custom made solutions for the particular user are found by direct contact and prompt co-operation with governmental authorities all over the world. This international experience is the base for further product optimisation, which is advantageous in all business areas of this group.

With the Zephyr II rimfire rifle, Austrian expert Steyr Arms has succeeded in America by winning the coveted "Rifle of the Year" awarded presented by the National Rifle Association (NRA).

The rimfire rifle comes available in calibres .17 HMR, .22 Long Rifle, and .22 WMR and was awarded "Rifle of the Year" by the National Rifle Association of America.

The Steyr Arms Zephyr II convinces with high-quality processing using only the best materials, elegant design and the typical Steyr Arms precision.

This is not the only award the rifle has received as the Zephyr II also claimed "Gray's Best Award" awarded by the Gray's Sporting

Journal.

Together with the other high-quality weapons made in Ramingtal, Austria, the Zephyr II contributed to the "2019 Awards of Excellence" presented by Sporting Classic Daily.

Steyr Arms says that it is very pleased to have won these awards and to have contributed to the excellent image of the "Made in Austria" brand.

"The Steyr Zephyr II is a call back to the day when blued steel and walnut were the foundation

on which firearms were built," says Richard Mann, field editor, American Hunter.

"This rifle will shoot with rimfires costing twice as much, while looking better and weighing less. It is the prodigy of a legend and maybe the gateway to the other excellent Steyr firearms that come out of Austria. The Zephyr II is the rimfire the gun world needs to help it truly understand that a good .22 rifle is indeed something of value."
